

MELALEUCA SECURITY

ALARM SYSTEMS & VIDEO SURVEILLANCE

PROTECTION YOU CAN COUNT ON FROM PEOPLE YOU CAN TRUST

OUR ADVANTAGE: THE LOWEST NATIONWIDE PRICES

Melaleuca Security provides security alarm and video surveillance options beyond what traditional alarm companies can provide. Basic and Interactive Security services monitor intrusion, medical emergencies, fire, flood, freeze or carbon monoxide concerns in your home. Interactive video cameras monitor activity inside and/or outside your home with live and recorded video directed to your cell phone or computer. You can have custom notifications sent to you via text message, email, or telephone call alerting you of possible problems in your home. These products and services are very flexible and customizable to your needs.

BASIC SYSTEM COMPONENTS

Your Melaleuca Security system comes complete with the essentials to cover a typical home. Included are the following:

- **Control Panel/Keypad**—Used to turn your system ON and OFF
- **Loud Interior Siren**—Alerts you of potential danger
- **Backup Battery**—Powers the system during power outages
- **Telephone Jack**—Connects your system to your landline telephone
- **Door Sensors**—Monitor your entry doors
- **Motion Detector**—Monitors movement activity in the home
- **Yard Sign/Window Decal**—Warn potential intruders that you have a security system
- **Expandable Capacity**—Add up to 40 wireless devices

BASIC SYSTEM FEATURES

Your Melaleuca Security System includes top-of-the-line features.

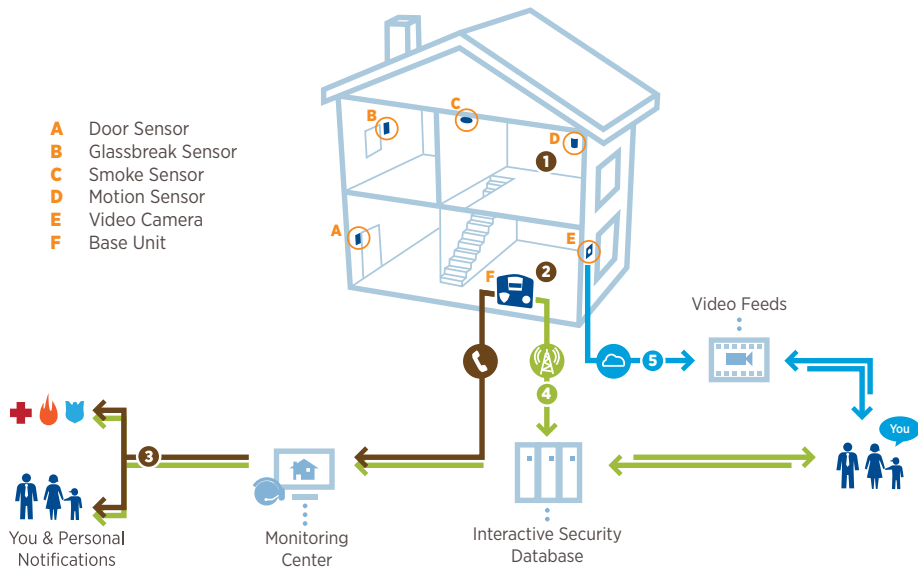

- **24-Hour Monitoring**—Central Station operators are always standing by for you
- **2-Way Voice Intercom**—Allows operators to speak and listen inside the home during an alarm event
- **Emergency Buttons**—Request dispatch of Police, Fire, or Ambulance with one button
- **Backlit LCD Display**—Visual menu and status notification
- **Arming Buttons**—Arm your system with one button
- **Voice Annunciation**—Tells you when doors are opened (and which doors are opened)
- **Remote Telephone Access**—Arm, disarm, or check system status from any off-site phone

GET ALL THIS PROTECTION FOR LESS THAN A DOLLAR A DAY!

Save up to 50% compared to equivalent services with other companies. That adds up to several hundred dollars every year. The average alarm user keeps their service for over 7 years, which can save you several thousand dollars in the coming years. We can even do that while providing an industry leading average response time of only 17 seconds in an emergency.

There is really no reason to delay any longer, call now!

HOW YOUR SYSTEM WORKS

- **A BURGLARY OCCURS IN THIS COUNTRY EVERY 14.6 SECONDS**
- **63% OF BURGLARIES OCCUR DURING THE DAYLIGHT HOURS**
- **65% OF BURGLARS COME THROUGH ENTRY DOORS**
- **HOME FIRES WILL KILL 3,040 AND INJURE 14,960 PEOPLE THIS YEAR**
- **YOUR HOME IS 3.1 TIMES LESS LIKELY TO BE BURGLARIZED IF YOU HAVE A MONITORED SECURITY SYSTEM**
- **YOU COULD SAVE 5%-20% ON HOMEOWNER INSURANCE BY INSTALLING A MELALEUCA SECURITY SYSTEM IN YOUR HOME**

With a Melaleuca Security system in your home you will be able to choose how and when to turn it on. From the keypad or remote device, you can arm your system whether you are home or away. When the system is on, if activity is detected ①, a loud siren on the keypad will sound ② to scare off intruders and notify anyone in the home of the danger. The security system simultaneously transmits ③ a signal to the central station to alert the dispatchers of what is going on in your home. If you have a false alarm, you simply cancel the alarm by disarming the system or by telling the central station dispatcher your verbal password. In the event that the alarm is not cancelled by an authorized user, the central station will dispatch ④ the necessary local authorities for the burglary, fire, or medical emergency situation. The central station will then ⑤ notify your predesignated friends and family of the situation at your home so that they may assist as directed by the authorities. If you have the Interactive Security with the GSM Cellular Communicator, you may also be notified via email or text to your cellular phone ⑥. The interactive service also allows you to access your system remotely at any time ⑦. Video cameras transmit video over the Internet to the video server ⑧. You may be notified via text or email ⑨ of any unauthorized activity in your home. You can also watch live or recorded video anytime from your cell phone or computer ⑩.

LIVE AND RECORDED VIDEO SURVEILLANCE

Melaleuca Interactive Video allows you to look into your home or place of work anytime to view live or recorded events. You can install video cameras anywhere inside or outside your home. You then set your preferences online to notify you on your cell phone or email when there is unauthorized movement on the camera. You can immediately see what is happening at home from your cell phone or computer. This can be added to your Interactive Security System or purchased as a stand-alone service.

Video surveillance is a great tool for working parents whose children come home before they do. You can check in on the kids to make sure they are home and staying out of trouble. You can also set up a camera on the entry of your home so that you will have a record of everyone who visited your home throughout the day. Of course the main advantage of having live video surveillance in your home is that if you ever have unauthorized activity in your home you are able to take quick action to respond to the situation or request emergency response from local authorities.
